➤ Team Information:

Ramya Thambabattula

Muhammad Tayyab

Dallas Diaz

Muhammad Arslan

➤ Team contribution report

Each team member has helped in outlining the PowerPoint and adding the information that is needed to present our business plan for our product. We also came together to format the PowerPoint to present our business plan in a professional manner and make sure that anyone who reads it has a clear understanding of what the presentation is about and what we are talking about.

The second item we worked together on was the video. Once we were able to create our business plan using our ideas and AI, we used it in video to construct a video about our business plan. To make it more specific to what we wanted, we split the business plan into smaller sections and stuck the individual sections into the in-video text to video prompt. This way, like I said, it can be more specific, and the video can be a little bit longer but also stay under the six-minute cap.

➤ Team Percentages:

Dallas Diaz – 25%

Muhammad Arslan – 25%

Muhammad Tayyab- 25%

Ramya Thambabattula – 25%
